Report on

Title of the Event / Program	DESIGNING PROJECT USING RECENT TECHNOLOGIES
Date of event	10.12.2024
Time	03:00 PM
Target Audience	Second Year Students from CSE(AI) and AI&DS Department.
No.of participants	120
Chief guest	Dr.K. Sathish Babu, Principal
Organized by	Department of CSE (AI)
Faculties In-charge	1. Mrs.N.Tejaswini, Asst.Professor, Dept. of CSE (AI) 2. Mrs.P.Sirisha, Asst.Professor, Dept. of CSE (AI) 3. Mr. T.Soma Sekhar, Asst.Professor, Dept. of CSE (AI)
Venue	Seminar hall (Room No.405)
Resource Person	Dr.M.Roshini, HoD -CSE(AI), ACEM
Description of the Program	<p>Designing a project using recent technologies involves selecting modern tools, frameworks, and methodologies that enhance efficiency, scalability, and innovation. The students can able to understand to define the Project Scope, Choose the Right Tech Stack, Design the System Architecture, Development Process, Security Best Practices, Testing & Optimization, Deployment & Scaling and Maintenance & Future Enhancements.</p> <p>Dr.K. Sathish Babu, Principal-ACEM addressed the importance of the seminar by leveraging modern technologies such as cloud computing, AI, blockchain, DevOps, and microservices, the students can build highly scalable, efficient, and secure projects. The key is to select the right tools for the job and follow best development practices.</p> <p>Dr.M.Roshini, HoD - CSE(AI) motivated the students with this seminar to adopt new technologies to cultivate their knowledge along with their academics for designing project. Designing a project using framework technologies involves several critical steps, from selecting the right framework to implementing best practices in development. Below is a structured approach to designing a project using modern frameworks.</p> <p>The event was organized with 120 student participants.</p>
