Description of the Program	<p>The Mini Project Expo, conducted under the Echo of ECE banner, provided third and final-year students an opportunity to exhibit their technical knowledge and creativity through innovative mini projects. The event aimed to bridge the gap between theoretical learning and practical application by encouraging students to develop working models based on electronics, communication systems, and embedded technologies. Participants effectively showcased their problem-solving skills, research approach, and teamwork through their project demonstrations.</p> <p>The expo served as an interactive platform for students to share ideas, gain feedback, and experience real-time evaluation from faculty and experts. Projects were assessed based on originality, technical depth, presentation, and societal relevance. The event successfully highlighted the students' engineering aptitude, fostering confidence and motivation to pursue further research and innovation in their academic and professional journey.</p> <p>The competition ended with prize distribution.</p>
