## Report on the Event “National Education Day”

**Topic:** “National Education Day”

**Organized by:** Department of Computer Science and Engineering (Artificial Intelligence)

**Date:** 11th November 2025

**Venue:** Z.P. High School, Chandramakula Palli, Ontimitta Village

The Department of Computer Science and Engineering (Artificial Intelligence) organized an outreach program on the occasion of **National Education Day** to honor the birth anniversary of **Maulana Abul Kalam Azad**, India’s first Education Minister and a visionary leader who believed that education is the backbone of national development. The event aimed to spread awareness about the importance of education and inspire young students to pursue learning with passion and perseverance.

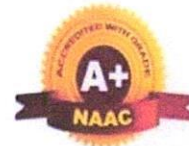

As part of the celebration, the students of CSE (AI) performed a meaningful skit titled “**Importance of Education.**” The play depicted two contrasting families – one rich and careless, and another poor but hardworking. The poor girl, through her determination and education, rose to become a **successful manager** in a reputed company, while the rich boy who neglected his studies ended up struggling for employment.

In a powerful and emotional scene, the same rich boy attended a job interview where the poor educated girl was the manager. This turning point effectively highlighted the moral that **education is the greatest equalizer** and that true success is built through knowledge and hard work, not wealth.

The students of Z.P. High School were deeply moved by the performance. Many students expressed that the skit helped them understand the real value of education and how it can change lives. They shared that they felt motivated to study with greater dedication and become role models for others in their village.

The **Head Master** of Z.P. High School appreciated the efforts of the CSE (AI) Department for bringing such a meaningful activity to their school. He praised the students for their creative presentation and emphasized that education not only helps achieve career goals but also builds responsible citizens who contribute to the progress of the nation. Teachers of the school also expressed their gratitude for organizing such an inspirational event that blended entertainment with learning.

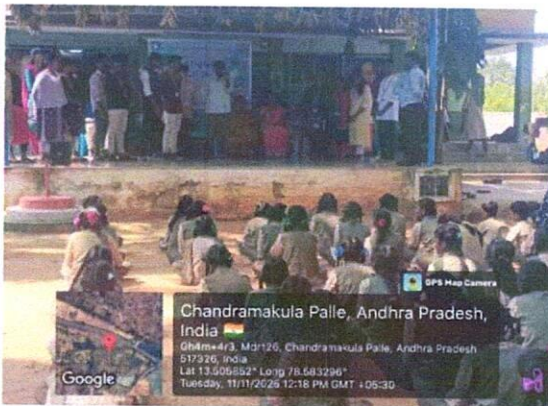

Faculty members from the Department of CSE (AI) also addressed the gathering, motivating the school students to dream big and make education their strongest foundation. They discussed how technology and artificial intelligence are shaping the modern world, and encouraged students to explore these fields with curiosity and confidence.

### Photos of the Event

Students perform a skit to educate the students.

As Part of the Event the Head Master of High School was facilitated.

### Conclusion:

The National Education Day celebration organized by the Department of CSE (AI) was an inspiring and impactful event. It not only created awareness about the importance of education but also strengthened the bond between the academic community and local schools. Through meaningful performances, speeches, and interactions, the program successfully conveyed the message that education is the true power that transforms individuals, families, and society at large. Overall, the event was a grand success and left a lasting impression on both the organizers and participants, reminding everyone that **Education is the most powerful weapon which you can use to change the world.**
